

# htc desire 626s Teardown

Written By: Mj H

## Step 1 — htc desire 626s Teardown

- The tools you need are something to pry the frame open and two screw drivers one philip and one security torx

## Step 2

- Start with opening the back of the phone

## Step 3

- Then unscrew the 7 screws that are around the frame of the phone and don't forget the one screw thats in the middle

## Step 4

- Pry frame open with these tools and don't force it or you may snap your frame

## Step 5

- Then your going to take the battery outbid gently pulling upward on the wires that is connected to the white piece of plastic

## Step 6

- then you going to take the the strip on the left hand side of the phone and pull it out with you fingers

## Step 7

- then you take out the strip that is on the right side of the strip u just took out. (Use fingers)

## Step 8

- Then you then you pick up the top phone chip and go to the bottom of it to take out the black strip which is the last one.

## Step 9

- then take the bottom rectangle chip and take it out with the top square chip keep the black wire on the chips cause its hard to put back on

## Step 10

- Then take out the top speaker

## Step 11

- take out bottom speaker

## Step 12

- When your finished the phone should look like this
